

Keltbray

*Train to Gain funding invigorates the demolition and civil engineering firms' training programme.
Skillspoint acts as matchmaker for success.*

Background	Keltbray is the largest specialist demolition and civil engineering contractor in the UK. When it wanted to update its training programme, the firm turned to Skillspoint for help.
How Skillspoint helped	We helped Keltbray tap into Train to Gain funding for NVQs in disciplines such as Plant Operation Training and Highways Maintenance.
How the solution worked	We matched the company with a private training provider and ensured that its workforce remained qualified, multi-skilled and that its programme was cost effective. Over 800 employees have been involved in the programme to date.
Future plans	Keltbray is delighted with the way in which the training programme has developed, and it working with Skillspoint to expand it.
