

Morgan Est

*Extending training to all staff.
Skillspoint help Morgan Est create a training package that caters for all employees.*

Background	Morgan Est is a leading infrastructure services provider that specialises in designing and delivering complex engineering projects. It is part of the Morgan Sindall construction and regeneration group. The company has	a long established training programme for its skilled utility workers, but also wanted to extend the benefits of nationally recognised qualifications to its office staff and other employees.
How Skillspoint helped	Skillspoint partnered Morgan Est with Dudley College to offer staff NVQs in Business Improvement Techniques. The qualifications are excellent for the company's requirements, as the training	enables staff to become more efficient and productive, better problem solvers and more effective team players. They also benefit from gaining a nationally recognised qualification.
How the solution worked	Aside from the benefits outlined above, staff found the NVQ programme extremely	enjoyable over its first 12 months of operation.
Future plans	Morgan Est has been impressed by the success of the Business Improvement Techniques training and now plans to roll it	out nationally. It will also focus attention on improving staff members' soft skills.
